DETAILED ACTION

Allowable Subject Matter

Claims 1-7, 9, 17-19, and 23-26 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1 and 17 require that a first user speech profile is associated with a first portable electronic device and a second user speech profile is associated with a second portable electronic device, and that the two devices are prioritized. Claims 1 and 17 further require receiving a first control signal from the first device and a second control signal from the second device and selecting, based on the prioritization, the first user speech profile associated with the first portable electronic device or the second user speech profile associated with the second portable electronic device.

Himellstein et al. disclose a system wherein a plurality of users are each associated with a plurality of portable electronic devices. When the system recognizes an allowed portable electronic device the system will recognize speech from a plurality of users. However, input commands are compared to all of the voice templates stored in memory (i.e. an input command is compared to a plurality of user's voice templates). Thus, Himellstein do not disclose selecting a user's speech profile based on the control signal received from the portable electronic device.

Curry et al. disclose a system that identifies the user, then selects a user profile for the user once the user is identified.

However, neither Himellstein et al. or Curry et al. reasonably disclose or suggest receiving two control signals (from a first portable electronic device and a second

portable electronic device) and selecting a first user speech profile associated with the first portable electronic device or a second user speech profile associated with the second portable electronic device based on a prioritization of the first portable electronic device identifier and the second portable electronic device identifier.

Similarly, with respect to claim 23, Himmelstein and Curry et al. do not reasonably disclose or suggest receiving radio frequency signals from a plurality of portable electronic devices within a proximity of a vehicle and selecting a user speech profile from a plurality of user speech profiles associated with the plurality of portable electronic devices, based on pre-established prioritization information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
